## The Canadian Shield

For an Up-to-date Study

Introducing the Canadian Shield  
Mining in the Canadian Shield  
Forestry in the Canadian Shield  
Transportation in the Canadian Shield  
Hunting and Fishing  
in the Canadian Shield

*Fourth of a Series:* This new Canadian Shield set of filmstrips is the fourth in the Canadian Geography series. The previous sets were: *The Atlantic Region* - six filmstrips, *The Great Lakes - St. Lawrence Lowlands* - six filmstrips, *The Western Plains* - five filmstrips. In production now is a new set in this series, *The Mountains of the West*.

Transportation in the Canadian Shield

Here is a bright new look at Canadian geography in the Canadian Shield region.

Photography for all five filmstrips is new, taken from the air and on the ground by men skilled in such assignments.

The maps, charts, diagrams were also designed in accord with recent trends in Canadian geography teaching.

The teacher's manual provided with the filmstrips - a combined text for the five - was written by a practicing teacher of geography.

Forestry in the Canadian Shield

Hunting and Fishing in the Canadian Shield

Transportation in the Canadian Shield

Introducing the Canadian Shield

Mining in the Canadian Shield

**936148**  
**Introducing the Canadian Shield**  
 42 frames, colour, captions

This filmstrip places the whole shield region and then notes its characteristics of climate, vegetation, mineral resources and how they influence the life of its people. Frequent maps and diagrams clarify climatic factors, glacial movements, vegetation zones, while photographs show the details and frequent questions involve the students in the lesson.

**936149**  
**Mining in the Canadian Shield**  
 47 frames, colour, captions

A thoroughly up-to-date view of the fast-changing industry. After showing samples of important ores, this filmstrip moves quickly to how they are located today by use of electronic probes and detectors. Photographs of the mining and reduction of ore were made at Sudbury, the world's largest nickel development. The picture sequence showing how a mining town develops was made at Shefferville, Quebec.

**936150**  
**Forestry in the Canadian Shield**  
 47 frames, colour, caption, manual

The wealth of a natural resources found above ground is discussed in this filmstrip. From questions about the types and distribution of the trees, the filmstrip proceeds to an examination of how timber areas are opened up and then how the cutting and transportation of wood is handled. Again all the recent practices of the industry, especially mechanization, is shown with new photographs of actual operations.

**936161**  
**Hunting and Fishing in the Canadian Shield**  
 44 frames, colour, captions

Tourism, recreation, hunting, trapping, fishing are all shown here in new attractive color photography. Maps, charts, text frames relate the animals, fish, birds to their locations and show the location of national parks and other significant regions. But here it is the photos that catch interest since each shows someone at some occupation - scraping a pelt, trapping a beaver, or fishing a twilit lake.

**936162**  
**Transportation in the Canadian Shield**  
 40 frames, colour, captions

Road and rail transportation is difficult in the Shield region and from the pictures students quickly see why. But there are other ways in and out of key regions. Photographs show the river and air routes and how they are utilized, including a recent trend to helicopters. Throughout this filmstrip, as in the others, students are engaged directly in asking and answering questions about the subject.

Filmstrips may be purchased either singly or in sets. The set of five *The Canadian Shield* filmstrips cost \$18.00 when ordered as a complete set. Purchased individually, these color filmstrips cost \$4.00 each.

Purchase orders should be addressed to:  
 Canadian Division,  
 National Film Board of Canada  
 P.O. Box 6100, Montreal 3, Quebec

A postage-paid reply order card is enclosed for your convenience.

**Some films for geography studies**
